An Initiate Towards Women Safety

Purpose

After a quick survey, we found many cases against women safety and reasons for adultery which makes our country poorer, so we started planning about safety and then found many apps related to this, but it was not so friendly therefore we have tried to make an app that is quicker and easier for any user to use in a different type. The main purpose of this app is only and only for safety.

Structure

SIGN UP (Enter name and Create a YUV PIN)

VERIFY (Login by YUV PIN)

HOME

SHARE (Share your live location)

▼

SAVE (Save your live location)

GET STARTED (Set delay time to send SMS in every second or minutes)

SET REMINDER (Set reminder, first set when the service will start then set the delay time)

NEARBY POLICE STATIONS (You can find your nearby police station by pressing a single button)

SAVED LOCATIONS (Here you'll find all saved locations)

PROFILE (Here you can edit your personal details)

ALERTS (Add all your relatives numbers to send your status in emergency)

ABOUT (About the Yuvti App)

Prototype

App tutorial

Installation, the app required a name and protection YUV PIN, it will verify the YUV PIN then you all set to go.

- Starting with saving and sharing location from popup button – you can either save or share your live fetched location to any platform.
- Then save your relatives phone numbers however you want from Alerts secession
- After all, press the GET STARTED button from home page and then set a time, this time will be a delay of sending SMS. A notification will be continuously pop-up in the given time if you press "No" or not responded for 10 seconds then notification will be disappeared and a customized message from Profile secession will be sent as SMS to the target devices and even not responded for 30 seconds then a SMS with live location and women safety number will be sent to the target devices, or to deactivate service you can either chose "Yes" from notification or by pressing STOP SHARING manually form the home page.
- SET REMINDER – by pressing this button from homepage you'll need to set two different time bar, first time is to set when will the Yuvti service start and second will set the delay of time as GET STARTED, then have the same process of GET STARTED service will continue.

- By long tap on analog-clock you can enjoy another view of clock.
- Nearby Police Station – This will direct you to Google map displayed with nearby police stations for your protection which you can contact directly.
- Saved Location option will display all your saved locations
- In Profile secession you can change your personal details.

Why this App

This includes SMS cell broadcast to convey messages to multiple people (relatives) with certain customized information and live location continuously with a gap of specific given time, or users can set reminder for safety. So, the receiver can be active due to receiving SMS and location continuously.

Permissions

This app has two general permissions

1. Location (to save or get live locations).
2. SEND_SMS (to send live locations and customized message as SMS cell broadcast).

Key Notes

- It is a free app
- This application can work without internet (it uses GPS)
- Users can send customized messages in emergency time
- If you are going to feel insecure, you can set a reminder
- For quick help you can know the nearby police station in one click
- You can save and share your current location if you want
